Join us for a free aquatic entomology program for kids!

Beaver Ponds Environmental Education Center, a 501(c)(3) nonprofit located on Sacramento Creek near Fairplay, is offering this free program for kids ages 4 and older with a parent. We'll answer these questions. What kind of aquatic insect builds its own house from tiny pebbles? What does a baby dragon fly look like? What insect has a lightning fast, expandable jaw to capture its prey? Plan to get wet while learning all about bugs and water. Bring water shoes. Enjoy all nature has to offer on 70 acres at 10,200 feet.

Staff will be providing guided tours of the property on the hour between 10am – 3pm. In addition to learning about ecology and our namesake beavers, you can expect to visit the barn and learn about alpacas, llamas, goats, and chickens. You can also visit the greenhouse and learn how to keep a year round garden. Visitors will also learn about five types of renewable energy and ways to make forests healthier.

Can't make it? Our final summer visiting day is September 3rd.

August 6th, 2016, 11am
