

EARTH DAY

APRIL 22, 2017

ANIMALS NEED WATER, TOO!

Beaver Ponds Environmental Education Center (501c3) has invited Nature's Educators back for Earth Day. Come meet a bald eagle or osprey as well as other critters, like a frog and water snake, for a not-to-be-missed hands-on program geared for all ages! Find out how they use the riparian ecosystem to live, eat, and play their own important role helping keep their habitat functioning.

This one-hour program starts promptly at noon.

Join Beaver Ponds staff for guided hikes throughout the day.

Let's celebrate our earth by learning more about wildlife on this very special day dedicated just to her! Our mission is to provide environmental education that gives individuals of all ages the tools and knowledge to become better stewards of the earth.

Meet an eagle or osprey and other critters between noon – 1pm

Live music at 2pm

Guided interactive hikes 11 – 3pm

BYOT-shirt (or scarf) to tie-dye with natural dyes!
